### MAKE ME THINE!

Why should I he a slave to sin,
To fees without and fees within? Sometimes I mount, sometimes cast down,
Sometimes all smile, sometimes all
frown.

Be Thou my strength, be Thon

my all
Then surely I shall never fall;
If none can pluck me from Thy hand,
I more than conqueror shall stand.

Tis true I have no room to hoast, When most I'm saved I'm humbled most;
Kept low hy grace, and not by sin,
My soul shall make her boast in Him.

WISH to dwell for a little while upon the Miracle of Holiness, or, in other words, the super-natural lowest of the experience of End

element of the experience of Full Salvation as taught and enforced by The Salvation Army.

Let me draw a preliminary picture. Imagine that into one of our tallas—right on to the platform of the salvation of the the touch, and the man is a taken.

His eyes are opened, disease removed
or the paralytic is made strong to
walk and work. We should go home saying we had seen a miracle— something done which all human nowers combined had failed to

ompusa. want to say that the Full Salva-I want to say that the Full Salva-tion of man-the Sanctification of his nature and his enduement with power is as truly a Divine Miracle as would be an act tonching a man's physical condition such as I have described. I call it, indeed, the Holiness Miracle.

was foreibly reminded of this in my devotional reading. The Scripture portion for the day had two parportion for the day had two passages placed in combination. One was from Ezekiel's record of his vision of the valley of dry hones. After describing the scene in the valley, the record runs, "Thus saith the Lord God unto these hones: Behold, I will cause breath to enter into you, and ve shall live. . . And the breath came into them, and they ed, and stood up upon their feet,

lived, and stood np upon their feet, an exceeding great army." The second passage was from the prayer of Paul for the Thessalonians, and specially these words, "The very God of peace sanetly you wholly; and I pray God your whole spirit and soul and body he preserved blamcless unto the coming of our Lord Jesus Christ. Faithful is

BY THE CHIEF OF THE STAFF

He that calleth you, who also will do it."

I was deeply impressed by the miraculous element revealed in both extracts. I saw how the same supernatural power displayed before the eyes of Exekiel was required for the fulfilment of Paul's desire. In each case there was a visible need, and equally the result could only be the work of the same Spirit of God.

I understand something of what a man may do who seeks to rectify the evils of his own nature. I underthe evils of his own nature. I under-stand something of the power of good training and self-discipline, and also the great value of moral standards and the cultivation of virtue and clean living; but I also know that we have abundant de-monstration of the fact so well exmonstration of the fact so well ex-pressed by our late General when he said. "You cannot keep the holy law of God with an unlooly heart." That which makes the difference,

That which makes the difference, ransforms the heart and gives the qualifying power, is a Miraele of Grace.

The spiritual life begins is a miraele—"Ye must be born again," said Jesus—"born of the Spirit." Adqually the cleansing and empowering, or in other words, the Sanctification of a man is as much a Divine Miraele as that which Erekied witnessed. That Miraele is what I witnessed. That Miracle is what I want the reader to make sure of in regard to himself, and I repeat the Apostle's prayer, "The very God of peace sanetify you wholly."

peace sanctify you wholly."

Let me make it clear that the condition in which men find themselves is no impassable barrier to Holiness. The Aposte's word, "Faithful is He that calleth you, who also will do it." together with the illustration from Ezekiel's transformed wellow, removes all ground.

formed valley removes all ground

for doubt. "The impossible shall be," and the spiritual miraele shall even transcend the one seen by Ezekiel.

It is, however, very disappoint-ing that in the face of God's rich

ing that in the face of God's rich provision so many should regard the Blessing of Holiness with doubt, or even unbellef.

When looking over the desolate seeme of death or decay, Ezekiel heard the question, "Son of man, can these der bones lives? His reply, "O Lord, Thou knows!," may appear a very modest one, but I think Ezekiel's modesty was clook for his doubt, almost equal to cloak for his doubt, almost equal to saying. "I don't think it can be done." The same attitude of doubt exists in many hinds regarding the spiritual transformation indicated in the Apostle's prayer. "Can a man he sanctified wholly and be presery of from sin aid sinning?" Some-times the answer is modestly ex-pressed in the words. "I don't

times the answer is modestly expressed in the words, "I don't know," but often "it comes in words of positive unbellef such as, "It cannot be done." The cannot be done. The cannot be done. The cannot be done to the canno Baptized with power, they have gone on singing:—

'Tis done. Thou dost this moment

Save, With Full Salvation bless; Redemption through Thy Blood I

have,
And spotless love and peace."
Even in a physical sense we find a parellel between Ezckiel's statement and Paul's prayer, which in-

cluded the sanctification of the spin-sical, the prayer that our woold body may be sanctified and kept of the spin of the spin of the spin of the Galeties, shools of treating seak much of "the sinful field at it is is not so much a more mile as a physical one—that it is in the mater all flesh or purely physical makes the that the tendencies to sinds they speak of the amerities and the spin of the speak of the amerities and that the tendencies to sin exist; they so eak of the appetites and propensities of the body being such that their motions cannot be purified—that men must and will "act out their nature," hence there can be no real Holiness in this life as regards the hold.

real Holiness in this life as regards the body.

But that surely only shows the necessity for the Divine Miracle 2 am talking about, and our business is to get the Miracle performed in ourselves and others, so that with a sanctified body we may please and ginrify God.

But for this Miraele, there would

he no hope for such as the drunks and. The taste or craving has hecome so all-powerful that his poor weakened will power cannot resist the temptation. His hody has even become diseased, rendering him an almost helpless vietim of his sinfil ho his

habit.

And so it is in a greater or lesser degree with other bodily habits. The tendencies have been so violded to and the appetites and passions so indulged, that they often govern the entire man. His judgment and cons-cience may be all against his practices, and he may have to say, "When I would do good, evil is pre-sent with me," so that 'with the mind I serve or recognize the law of God, and with the fiesh I serve the law of sin," but settle it in your minds that God never intended that to be the normal state for Hischil dren; His will is to sanctify as wholly, including the body—and of this we have the assurance. ful is He that calleth you, who also will do it."

### THE FORLORN HOPE

HOW-A SOLDIER ANSWERED AN IMPORTANT QUESTION

IN and out of the "Cap and Bells" surged a crowd of men and wo-men. The place was recking with the pungent odour of spirits and stale beer. Everyhody was talking the pingent odour of spirits and stale beer. Everyhody was talking at once. Orders were being given. The chink of money, the clink of the beer glasses, the clank of tank-ards, the thump, thump of the beer engines, the buzz of the lights, and the babel of voices made it an allo-gether bewidering place.

Though eivilians predominated, there were several sailors and soldiers amongst the company, and well—no better than they ought be. They were the veriest drabs. Ponr, battered, broken-looking crea-tures, it was evident they had serv ed a long apprenticeship at their calling. The sight of them even in the half-lights (they were careful not to get into the full glare) was an utterly sad one.

One of their number was paying attention to a youthful-looking sol-dier. With wily insinuation she ogled and begged, nutdged and whis-pered and laughed—a hoarse, caekl-ing kind of laugh. Presently she succeeded in urging the young felntly arrived at some understanding, passed out into the dark-

ness with him.

Just then the sound of a chorus
was heard. It was the local Salvationists singing "Will you go?" Around the corner came a woman of the street and a soldier. For a moment the soldier stood swaying on the kerbstone, gazing at the Sal-vationists with a look of half-comi-

cal reproach on his face. "Come on!" cried the woman. "Cume on!" cried the woman, with a cacking laugh, sure of her quarry. "Come on, I say. Ha! ha! Even The Army is saying 'Will you go?" Now, then, young Icllow—will you go?".

The soldier suddenly earne to himself as the sound of the old chorus reached him; its real import seemed to have penetrated to his

seemed to have penetrated to his mind. Suddenly he stood as erect as on parade, and, while some flood of memory swept over his heart, his bronzed and not altogether unmanly looking face stiffened with resolu-

tion.

"Will you go?" cackled the poor drab plaintively at his side, scarcely understailding this sudden change of front?" Will you go, I say?"

"No!" answered the soldier,

"No!" answered the soldier, stamping his foot angrily, and, turning swiftly on his heels, be walked

quickly away into the night, away from the "Cap and Bells," away from the poor, unhappy woman, away even, for to-night, at least, from The Army's forlorn hope.

"Will you go, sister?" said a win-some voice at the side of the wosome voice at the side of the woman. It was the voice of a Sister of
Salvation, who was out doing her
Master's work. The picture of the
two faces could be seen under the
lamp. For a moment—for a moment only—it was like a picture of
Heaven and hell in one frame,

Heaven and hell in one frame,
"Will you go, sister?" repeated
the voice tenderly. For answer, the
noor, starving creature of sorrow
broke into a sudden passion of
weeping, while the arms of the Sister of Salvation were about her.

Let us ring down the curtain and give ourselves to meditation.—"Under the Colours."

### OUT OF THE ROOT

"The Lord is nigh unto them that are of a broken beart; and saveth such as be of a contrite spirit."

How often in the years of service among men who are "rolling in the mire," as quoted by Bunyan, does the Salvationist hear these words, the Salvationist hear these words, "I have gone astray like a lost sheep," and diligent soul-dealing with the regrettly and penitent turns the words into prayer. When a man can honestly and truthfully say from a contrie heart, in language such as this, that he realizes his condition, then the heart is drawing near to the Saviour.

Years ago in a glorious revival at a small country Corps two brothers, among many more, were swept into

the fountain of merey. The Divi-sional Officer was leading the knee-drill, and asked who should pray. The woman Field Officer said: "Ask Brother James —, he is a convert of ten days." He did as advised, and lames prayed thus:-

"O God, our Captain says you hear sinners when they pray right out of the root"-meaning the bottom of the honet. Then his brother prayed, saying, "O God, what our Jim says I say."

Now these were ideal prayers for the midst of a Revival, since they prove the existence of virgin soil, fruitful, and pure.

Both these brothers became Field Officers of some repute.

Officers of some repute.

Sincere repentance was manifested by the metamorphosis of life and deed. Young and foolish up to the great transaction, they had, like lost sheep, gone astray, wandering over every hillock and mendow within range, nibbling here and there at earthly pasture wherever it ap-peared. The woman Officer has long gone to her reward—but the bothers remain, and are putting forth at their respective Corps all the efforts to save men and women

May we who are Soldiers of King Jesus fight as devotedly to save as the brave soldiers of the nations do to secure victory.—"Social Gazetle."

Lieut-Colonel Bond threw him-self whole-souled and abandon into the fray; the Holy Spirit moved mightily, and a feeling of deep rev-erence pervaded as he told, by thrilling story; the consequences of sin on the homan life. The large audience soon became one in thought, one in desire, and one in thoughts of all present to run in the direction of gratitude, as did the Male Choir's rendition of "I've Found a Friend."

The Editor gave a powerful appeal, asking and answering questions of vital importance, explaining some of the promises of God, and by thought, one in desire, and one in purpose. The address had a telling effect, and when Colonel Smecton called for volunteers, three came and found the Pearl of greatest price; deciding to accept the words uttered as living truths and not idle tales.

It may be possible for some to suppose that, because the Staff Songsters take part in so many week-end campaigns they therefore tessen in eathusiasm and interest; but this is not the case. At live gatherings, four thousand persons were in atlendance, and Ensign Ursaki, out of a sum total of \$250, was able to give the Red \$250, was able to give the Red Cross Society \$100. Several Officers have utilized the visit of the Songsters as a means to assist the Red Cross work in the local cities.

Herwith we append a few samples of letter received by Lieut-Cobund Someton:

I thought you would be glad to thought you would be glad to know the net result financially of your week-end. It was consider-ably better than the year pre-vious. The total collections for the week-end amounted to over \$157, and the visir was of sub-S137, and the visit was of substantial financial benefit to the Corps. Great appreciation is being extressed by all over the meetings generally and the singe of the Songsters. Indeed, some already are asking to have another visit this summer. Kindly express our gratitude to the Brigade for their magnificent services.—E. Heberton, Ensign (S) (Cathorines). (St. Catharines).

I thought I would write and thank you and the rest of the Brigade for the splendid service you did us while up in Northern Ontario. The people of Hailey-bury certainly did appreciate the

scrvices. We hear nothing else wherever we go. One man said he would pay a dollar to hear the Male Choir and Orchestra again, and so many have said they hopand so many have said they hop-ed you, would come back again-soon. Needless to say, those are our sentiments, too, and we hope that you won't wait untit we leave Halleyhury. We have, been wondering if it would be possible to have a similar tour in-the Fatt. We should be delighted. Cosway, Captain.

I feel the meetings conducted by the Male Choir and Orchestra were a success all the way round. Next time we will endeavour to do one better. The Cobalt do one better. The Cobalt people enjoyed the services immensely: they will be remembera long time to come. It will be a pleasure to have you again, whether in Cobalt or elsewhere. E. Bird, Captain

### Recruiting

It is impossible to attend a recruit-It is impossible to attend a recruit-ing rally, or listen to recruiters "on the stump," without being greatly impressed with the dead earnestness of the speakers, and those who are making personal appeals. In fact, there is a great deal that Salvation, there is a great deal that Salvation-ists may learn in methods and tac-tics from the recruiting officer which are very much akin to the red-hot, reckless methods of the early-d y

To begin with, it is very apparent that recruiters for the British forces do not care what they do so long as men can be brought to enlistment. They will march the streets dressed in the most ridiculous manner, in order to arrest attention to the order to arrest attention to their purpose. The most theatrical and dramatic methods are adopted to make men feel how necessary they are to a British victory. Again, they frequent those places where people most do congregate and button-hole the apparently eligible with a vigour and persistency which some-times results in blows as well as

There is no close time with them: at any hour, night or day, they are ready to persuade a man that his King and country needs him; while from platform or car, or public steps, indoor or out, their utteraness are characterized by infense earnestness and conviction—especially is this no-liceable in the utterances of those who have surround from the travel. any hour, night or day, they are treasise in the utterances of those who have returned from the trenehes, where they have seen the horrors of war. Inspired by what they have seen and beard, they thrill men's souls with their words—those who can be thrilled.

Now, this, in the main, should be the conduct of the Salvationist, for all these extravagant methods are but the outcome of a deep desire to get men to don the King's uniform, and if it is so necessary to get men to enlist in the work of breaking down militarism and freeing the world from the incubus of war, how much more necessary is it to win men for God, and thus save them men for God, and rous save the from eternal destruction. Let us, then, be as earnest, as daring, and as zealous to recruit men for God as soldiers are to recruit men for the service of King and country. Let us also emulate their courage. It is us also emulate their courage. It is discouraging work sometimes to get men to give up sir and serve God. Some of the recruiting sergeants would have us believe that it is equally difficult to get men to give up their jobs and serve the Kingbut they keep at it. Let us not be weary in well-doing.

### FLOATING DEATH

The story of a North Sca trawler skipper's heroic battle with a mine. Entangled in the trawler's nets, it menaced the vessel and all on hoard, but Shipper Firth, by an exhibition of conhers and pluck, managed to get rid of the deadly thing without accident, though it was a touch-and-go business. In view of the fact that it was a drifting mine which blew up the "Hampshire" on which Barl Kitchenser was journeying, the following is instructive and interesting.

Not the least remarkable feature
of this extendid chanter is the fact of this splendid chapter is the fact that these men, prior to the war, were wholly without experience of discipline, save that which is the basis of all sea wsage. But the war came, and with it the mine peril. This came, and with it the mine pern. This
was their job, and they tackled it.
They are a tough breed, and whether
on mayal service with the ninesweeping fleets or in the pursuit of sweeping neets or in the pursuit of their own "lawful occasions," the fishermen of Grimsby and other English East Ceast ports have ac-quitted themselves like men. But even against this background

single-handed, but cold-blooded. To understand the story fully, it is necessary that the reader should have some comprehension of the manner in which a deep-sea trawler conducts fishing operations. In boat of the type of the "Pelican" boat of the type of the "Pelican" there are two large arch-shaped structures of iron raised fore and aft above the ship's side. These are known respectively as the fore and after gallows, and from the arch of each is suspended a pulley. Over these pullers pass the two warps, or steel ropes, by which the trawl is

towed. When fishing is to begin, the trawl is heaved overboard and allowed to sink to the bottom. The trawler then moves clowly alread the warns runming out freely from the winch, un-til the sunken net is some four bun-dred yards or so astern. The winch dred yards or 80 astern. this story is concerned.

The trawl is a large net, very wide at the mouth and gradually tanering to an elongated nocket at the far extermity. The business of the trawler is to drag the trawl over the bottom of the sea, the mouth of the net being propped open by two massive slabs of wood known as the "doors," The towing-warps are attached these "doors," their null causing the latter to slide upright on their steel-thod edges, and in so doing to keep the mouth of the trawl open.

The resistance of the water as the net moves along also helps to keep the mouth distended. The towing-warps pass from the doors of the treat over the pulleys suspended

One night, in the prayer meeting, they sang a chorus which brought //back memories to me. It was this: "Oh! 'twas love: 'twas wondrous

In my mental vision I saw again that Army Hall in Buffalo, where I thad sung that very chorus on a Sunday afternoon several years before.

That night, as we walked home together. I spoke out my beart's feelings, and was rewarded with the assurance from Annie that my affection was fully reciprocated, was a truly happy man that night.

The definite steps I had taken, however, seemed to awake me as from a dream. I began to realize that I was in no position to offer marriage to any young woman, and new ambitions began to shape them-selves in my mind. I felt degraded

(Continued from Page 12) and decision which averted that danger. He gave orders for the trawler's boat to be launched, and while some of the crew set to work while some of the crew set to work to cast loose her lashing, others col-lected stores, under the skipper's in-structions, with which to provision her. Food and water were placed in the hoat; also a compass and a small supply of rockets.

when the boat was launched the skipper ordered the entire crew him her, with directions to row hard until they should be sufficiently far away from the threatened ship to escape diestruction in the event of an explosion. He himself, he announced, would be reason on board. The boat's crew, having got a safe distance away, were to erise about within and mild recalled. In the event of a disaster, they were to re-turn to the spot and search among the wreekage for the skipper's body, dead or alive, and thereafter take their chance of heing picked up by some passing vessel.

some passing vessel.

The crew oheyed this order, and rowed away in the small hoat. The skipper, left to himself, proceeded. single-handed to tackle the mine. It single-handed to tackle the mine. It was no light task, for a mine is a heavy, eninhersome thing, not easy for one man to handle in the most favourable circumstances, and prac-tically defying manipulation in the actual conditions which Skipper Firth had to face. The violent roll-ing of the ship and the reciprocal plunging of the mine produced peri-lous complications.

For some time the plucky man, taking his life in his hands, wrestled with the awful incubus. Had the ship been steady the task would have slip been steady the task would have been relatively easy; under the actual conditions it was fraught with dire perils. What might have been a mere trial of strength and adroitness became a struggle—a duel, as it were, with some monster of the deep. One fancies that grim bout must have seemed like a might-mare to the sweating man engaged

At length the job was done, and At length the joh was done, and the mine freed from the warp which it had fouled. There ensued one supremely crucial moment when the deadly engine dropped finally into the sea, but luckily the vessel's leaving side failed to hit it, and it vanished harmlessly into fourteen fathonis of water

The next thing was to get clear of the danger spot. As the engineers had gone in the boat with the rest of the crew, the only course possible was to let the trawler defit away of herself. But to this a serious obstacle was provided by the dead-weight of the immense trawl dead-weight of the immense trawled which lay alongside. It was impossible, of course, for one man to make even an attempt to get it on board. Moreover, there would have been danger in meddling with the inert net, for if set in motion it would be exceedingly likely to foul the mine again, and bring about the very disaster which the skipper had fought so stremously to avert.

First therefore solven dis wishes have been applied to the mine to the course of the co

Hardly had the crew set foot on the trawler's deck again and hauled their boat on board than the ship staggered and was thrown bodily forward through the water as though forward through the water as though and had norward through the water as though some giant, unseen hand had clutched her. A huge column of water shot up hino the air at the point where the trawl had been left hehind, and a dull roar proclaimed that the mine, having doubtless come into contact with some of the now sunken gear, had exploded
